

Guardian Premier Package: The

Guardian Standard

Guardian can provide a package of services to optimize your organization's public safety standards. Enhancing your protective measures by providing the following services to further prepare your organization for crises:

1. Review or construct Policy/Procedure: This covers all public safety policies for your organization, which include disaster management, cybersecurity, business continuity, and physical security.
2. Provide an efficient and secure documentation review/storage process.
3. Our team will conduct a Cyber Security Assessment and provide an improvement plan for your organization.
4. Our team will provide a Physical Security Assessment and provide an improvement plan for your organization.
5. Our team will provide a Disaster Management/Public Safety Assessment and provide an improvement plan for your organization
6. Our team will provide a Business Continuity Assessment and provide an improvement plan for your organization
7. Our team will synthesize all of the assessments and construct and facilitate a set of training sessions for your management and frontline teams.
8. A Comprehensive After-Action report and Debriefing will be provided for your organization
9. We will provide you with a timeframe to review the metrics, improvement plans, and objectives to achieve the recommendations
10. Once the recommendations have been achieved, we will conduct a final review within the agreed timeframe, and we will provide a Guardian Certification for your business and an official Guardian Decal to place on your door to ensure your customers, clients, and consumers that your business has enhanced protection and prevention measures from nationally certified public safety subject matter experts.

Note: This may drop insurance rates with your business's insurance company. We will work with you and your insurance company to see what benefits could occur.
