

# **Guardian Hazard & Vulnerability Assessments**

Guardian uses the Kaiser format to conduct Hazard/Vulnerability Assessments for organizations and communities. These assessments are recommended annually and provide organizations and communities with an understanding of a qualitative and quantitative ranking system for hazards, threats, and vulnerabilities. The Guardian Team can facilitate this assessment to successfully rank and prioritize your emergency management processes based upon each hazard, threat, and vulnerability. This assessment can be conducted in one session or split into multiple sessions for optimal efficiency. This assessment can be provided remotely or on-site at your organization or community. Various leadership members of your community or organization will be assembled as subject matter experts to contribute to this assessment.

Please send us an inquiry if you are interested in scheduling a Hazard/Vulnerability Assessment with the Guardian Team.
